"People are always blaming their circumstances for what they are. I do not believe in circumstances. The people, who get on in this world, are the people who get up and look for the circumstances they want, and if they cannot find them, make them."

-George Bernard Shaw

## History

Digital Systems, LLC was formed in 2006 to provide professional IT services to our clients in the Federal, State and Commercial area. Our mission is to provide trustworthy, consistent and reliable services within our expertise in partnership with our clients to support the realization of their business objectives.

## Our Approach

We aim to harness our skills and experience to achieve successful outcomes for our clients. We build long-term relationships with our clients to deliver added value and real benefits over time. As ever, customer satisfaction leaves us satisfied

## Strategic Management

We have highly experienced management personnel to assist our clients in the full range of strategic planning activities necessary to effectively compete in the private and public marketplace.

## Program/Project Management

As defined in the PMBOK, project is "a temporary endeavor undertaken to create a unique product, service, or result and the project management is "The application and integration of project management processes for initiating, planning, executing, monitoring, controlling, and closing a project on time and within budget". As shown in the ISPMF, project management processes are the key standards of the PMBOK that are integrated into our framework to deliver the quality results to our customers.

- Strategic planning and management
- Project leadership and management
- Project management training, mentoring, coaching, and consulting
- Project capability maturity assessment: OPM3
- Performance Management

## IT Consulting:

We can provide you with the right IT experts at the right time to implement your critical applications. Should it be Database Administrator, Project Manager, Java, .NET programmers, Quality Assurance experts, Software tester and Business Analysts, or any other skills, we got them all.

## IV & V and Quality Assurance

We offer Independent Validation and Verification Testing Services. Our services improves the quality of your testing, reduce application maintenance and development cost significantly.

IV & V Testing is not limited to test execution and locating defects. It encompasses complete Quality Assurance and Quality Control across the complete SDLC, beginning from the requirement documents, design, coding and testing.

Digital Systems has a pool of dedicated test engineers specialized in the related technologies. We help validate and verify your business critical applications with greater success right from the beginning.

## IT Support and Services

We provide your business with consultation and support in a personal and professional manner. We have the tools and the expertise to resolve issues remotely, should it be a minor issue or the major. We can put our staff to your site should there be a requirement.

## Web Development:

We can build websites for small businesses or corporations at very reasonable price.

**Training: We provide training in the following areas:  
Software Quality Assurance, Project Management, Java, Oracle, and UNIX**
